END-OF-LIFE PRODUCT RECYCLING NOTICE

Grass Valley's innovation and excellence in product design also extends to the programs we've established to manage the recycling of our products. Grass Valley has developed a comprehensive end-of-life product take back program for recycle or disposal of end-of-life products. Our program meets the requirements of the European Union's WEEE Directive, the United States Environmental Protection Agency, and U.S. state and local agencies.

Grass Valley's end-of-life product take back program assures proper disposal by use of Best Available Technology. This program accepts any Grass Valley branded equipment. Upon request, a Certificate of Recycling or a Certificate of Destruction, depending on the ultimate disposition of the product, can be sent to the requester.

Grass Valley will be responsible for all costs associated with recycling and disposal, including freight. However, you are responsible for the removal of the equipment from your facility and packing the equipment to make it ready for pickup.

For further information on the Grass Valley product take back system please contact Grass Valley at + 800 80 80 20 20 or +33 1 48 25 20 20 from most other countries. In the U.S. and Canada please call 800-547-8949, and ask to be connected to the EH&S Department. Additional information concerning the program can be found at: www.grassvalley.com/about/environmental-policy

Ignite Release Notes

Introduction

This document describes compatibility, installation, and other information specific to the Ignite Release 7.2 which is a minor release for the Ignite Live Production Control System

Note For a current list of supported/controlled devices, contact an authorized Grass Valley reseller or contact Grass Valley sales directly (refer to *Contacting Grass Valley* *on page 4*).

Release Summary

This release provides support for the Grass Valley K-frame switcher products.

Enhanced Functionality

To provide Ignite integration with the Grass Valley K-frame switcher products, the following areas have been updated:

- Signal Routing
- Point Of Use
- Transitions
- Keying
- Handling of E-MEMs
- Source Memory
- 3-D Digital Effects handling

Compatibility

Hardware

This release is compatible with previous Ignite system hardware version 6.0 and above.

Software

This Ignite Release 7.2 only functions with the Media Object Portal (MOP) and does not support the XMOS server in previous systems.

Limitations or Restrictions

None known.

Installation and Configuration

Considerations

- When installing v7.2 Ignite on a system running v6.1.2 with a stand-alone Katalyst, it is best practice to first uninstall both Ignite v6.1.2 and the standalone Katalyst before proceeding with the v7.2 install.
- With v7.2, desktop experience must be enabled otherwise graphics may be compromised.
- Upgrading to v7.2 will require adding clipstatus.xml file in the misc folder (C:\\program files\GrassValley\Ignite\misc) configurator if they use Aurora statusing.

Hardware Installation

Only qualified Grass Valley Service Engineers are authorized to install Ignite Live Production Control System Release 7.2 software. Contact your local Grass Valley representative, your Grass Valley Ignite Technical Service representative, or Grass Valley Support Center (*Contacting Grass Valley* *on page 4*).

Software Installation

Only qualified Grass Valley Service Engineers are authorized to install Ignite Live Production Control System Release 7.2 software. Contact your local Grass Valley representative, your Grass Valley Ignite Technical Service representative, or Grass Valley Support Center (*Contacting Grass Valley* *on page 4*).
