# Moving Licenses in the Offline Environment (Cont.)

6) Accessing the Activation Server Log-in Screen on the Online PC

To access the activation server log-in screen, double-click the URL shortcut file (GV ActivationServer)created on the same place as the ID file.

7) Enter the serial number on the log-in screen, and click [Submit].

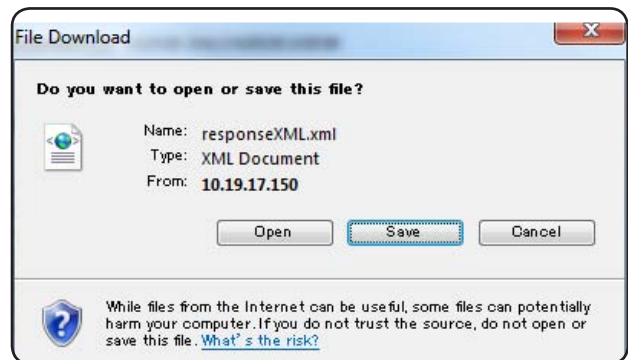

8) Click [Manual Activation].

9) On the [Manual Activation] screen, click [Browse].

10) Select the ID file (ID.key) saved in step 4 and click [Open].

11) On the [Manual Activation] screen, click [Submit].
The activation file is created.

12) Click [Save To File].

13) Click [Save], and specify the save destination for the activation file (XML file).
Save the activation file to removable USB storage media, etc.

14) Click [Offline Deactivation Register Activation File] in the [License List] dialog box on the move source EDIUS terminal.

15) Specify the activation file acquired in step 7, and click [Open].
The licenses are deactivated on the move source PC.

Start Up GV License Manager (Cont.)

[Settings] Dialog Box

[Show License Expiration Warning]	Set the timing to display a warning message for license expiration.
[Administrator Password]	Restrict license activation/deactivation operations to the administrator. Check this item and enter the administrator password.

Moving Licenses in the Online Environment

The following explains how to move licenses between EDIUS terminals in the online environment.

1) Start up GV License Manager on the move source EDIUS terminal.

2) Select products to deactivate licenses in the [License List] dialog box.

3) Click [Online deactivation], and click [Yes].
   Access the activation server automatically and deactivate the licenses.

4) Start up EDIUS on the move destination EDIUS terminal.

5) Enter the serial number, and click [Register].
   The license authentication is performed.

6) A message appears, and click [OK].

From the next time, perform steps 1 to 3 to move the licenses between the same EDIUS terminals.

Moving Licenses in the Offline Environment

Move licenses between offline EDIUS terminals via another PC in the online environment.

License Deactivation on the Move Source PC

1) Start up GV License Manager on the move source EDIUS terminal.

2) Select products to deactivate licenses in the [License List] dialog box.

3) Click [Offline Deactivation Create ID File].

4) Specify the save destination for the ID file in the [Browse For Folder] dialog box, and click [OK].
   Save the ID file to removable USB storage media, etc.

5) A confirmation message appears, then click [OK].

License Activation on Move Destination PC

1) Start up EDIUS on the move destination GV License Manager terminal.

2) Click [Offline Activation Create ID File].

3) Enter the serial number, and click [OK].

4) Specify the save destination for the ID file in the [Browse For Folder] dialog box, and click [OK].
Save the ID file to removable USB storage media, etc.

5) A confirmation message appears, then click [OK].

6) Access the activation server on the online PC, and upload the ID file saved in step 4, and then download the activation file.

For the procedure on the activation server, see steps 6 to 13 in "License Deactivation on the Move Source PC".

7) Click [Offline Activation Register Activation File] in the [License List] dialog box on the move destination EDIUS terminal.

8) Specify the activation file acquired in step 6, and click [Open].
The licenses are activated on the move destination PC.

Repairing Licenses in the Online Environment

If you cannot start up EDIUS on the license authorized EDIUS terminal, the license information may be corrupted. Try license repair.

1) Start up GV License Manager on the EDIUS terminal.

2) Select products to repair licenses in the [License List] dialog box.

3) Click [Online Repair], and click [Yes].

Access the activation server automatically and repair the licenses.

Repairing Licenses in the Offline Environment

If you cannot start up EDIUS on the license authorized EDIUS terminal, the license information may be corrupted. Try license repair. Repair licenses on the offline EDIUS terminal via another PC in the online environment.
