Terms and Conditions

Please read the following terms and conditions carefully. By using Kula documentation, you agree to the following terms and conditions.

Grass Valley hereby grants permission and license to owners of Kula to use their product manuals for their own internal business use. Manuals for Grass Valley products may not be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, for any purpose unless specifically authorized in writing by Grass Valley.

A Grass Valley manual may have been revised to reflect changes made to the product during its manufacturing life. Thus, different versions of a manual may exist for any given product. Care should be taken to ensure that one obtains the proper manual version for a specific product serial number.

Information in this document is subject to change without notice and does not represent a commitment on the part of Grass Valley.

Warranty information is available from the Legal Terms and Conditions section of Grass Valley's website (www.grassvalley.com).

Kula Release Notes

The *Kula Release Notes* includes lists of new features and enhancements, bug fixes, as well as known issues and limitations associated with the latest version of the Kula software.

Overview

Kula Software Version 6.4 Release 1 is a major release that adds many new features to Kula. This release also includes bug fixes that were resolved to improve the product.

Applicability

Kula Software Version 6.4 Release 1 applies to the following products:

- Kula
- Kula-IP
- Kula-12G
- Kula-AV

New Features and Enhancements

6.4 Release 1

- New Mirror added to K-Manager Pro giving the ability to sync Kula Mainframe Project files between Mainframes and a Master record on a PC file system, or simply to upload files from a PC file system library to one or more mainframes.
- GUI now gives a warning to show if IP Mav modules require an update. Go to menu 8871 to update an IP Mav module.
- Improved performance for Panels connected through poor quality networks.
- DSKs can now be added to outputs fed through Format Fusion HDR conversions.
- New Shadow Mainframe feature added allowing one mainframe to be shadowed by up to four shadow mainframes.
- New AMPP Control mode on Panels and Mav Remote units to allow Mav modules to be connected as IP Mavs.

Bug Fixes

6.4 Release 1

- GUI IP address dialogue boxes could not accept QWERTY keyboard entry.

- Keyboard text entry only worked using the popup.
- SWP08 router xpt not showing correctly on Macro Edit page.
- GPO setup menu (8733) would not respect the source selected when using the popup.
- Destination names not showing on SWP08 router protocol.
- Menu 12 could show incorrect resources.
- Kula AV not saving audio monitoring settings.
- MSP failed to update clock settings.
- MSP Saving Timestamp incorrect.

Known Issues and Limitations

The following is a list of known issues and limitations associated with Kula 6.4 Release 1.

- None.

Grass Valley Technical Support
