IQFDA31

Dual-channel 3G/HD/SD-SDI Reclocking Distribution Amplifier with Fiber I/O

Extremely space-efficient hybrid distribution amplifier for mixed fiber and copper workflows, with dual 3G/HD/SD-SD inputs with both SDI and fiber optic outputs.

The IQFDA31 from Grass Valley provides dual HD-SDI 3 Gb/s, 1.5 Gb/s or 270 Mb/s SD-SDI inputs with both SDI and fiber optic outputs in a single-width package. Flexible routing of inputs to outputs allows the module to operate as single- or dual-channel mixing fiber and copper I/O. Input signal loss detection enables switching from a main to back-up feed automatically, providing emergency changeover functionality. Its 80m 3G, 170m HD input equalization performance and non-reclocking distribution of wideband signals make it ideal for all distribution applications.

Why should you choose this module?

- The IQFDA31 is an extremely space-efficient hybrid distribution amplifier for mixed fiber and copper workflows
- Useful for critical installation thanks to outstanding input equalization capability
- Full GV Orbit compatibility provides an all-inclusive remote configuration, control and monitoring solution
- Comprehensive SNMP support allows easy integration with third-party Network Management Systems
