

IQTIC00

Third Party IP Control Module

The IQTIC00 provides Third party IP control systems with a "Northbound" control interface to SAM IP devices using the SDC-01 protocol.

For control system flexibility IQTIC00 is also able to be integrated seamlessly with Sam's IPEDGE-SRV controls servers.

Features

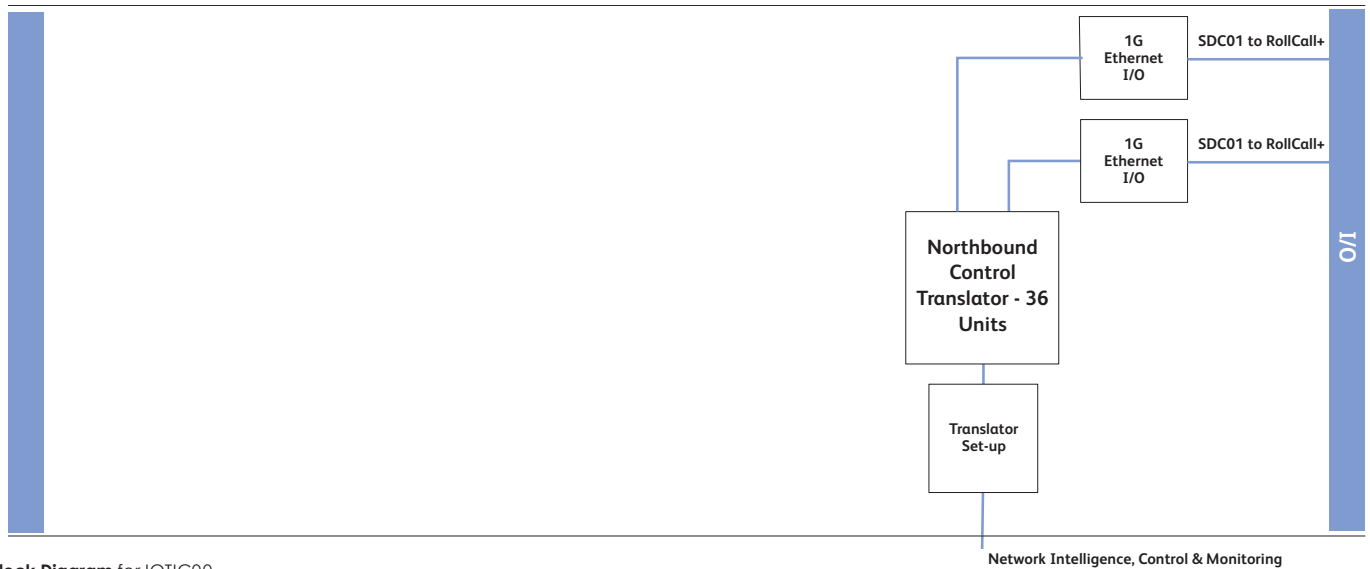

- Provides a "northbound" interface for 3rd party control systems to control SAM IP Edge Devices (i.e. IQMIX, Kahuna, MV8xx, Sirius S8xx, etc.) using SAM's "SDC-01" open-API protocol
- Support for up to 36 x SAM IP Edge Devices per IQTIC00 card
- Dual IQTIC00 card configuration supported for redundancy

Order codes - IQH3B & IQH4B enclosures

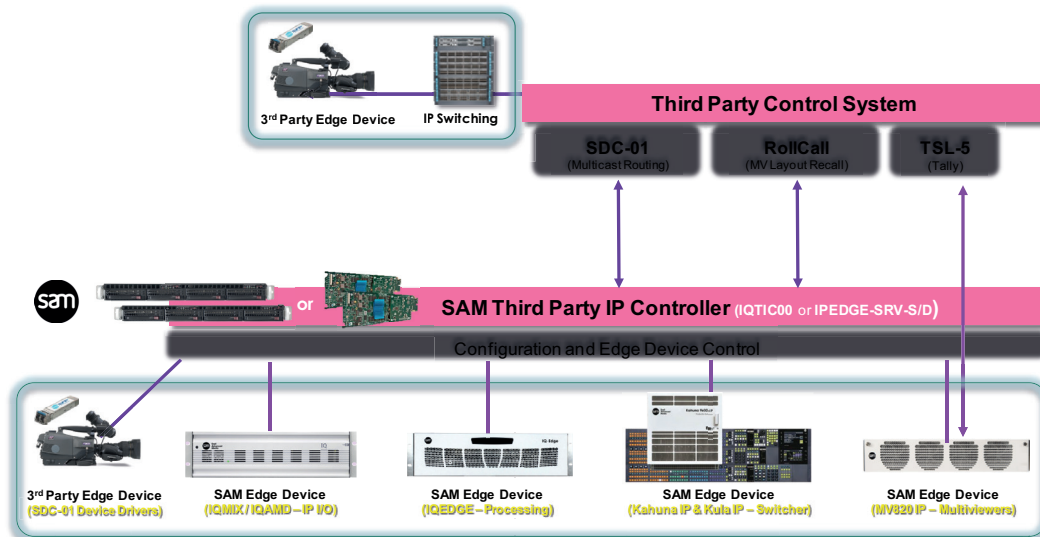

IQTIC0000-1B

Third Party IP Controller. Support for up to 36 x IP devices using the SAM "SDC-01" protocol. Dual 1G Ethernet I/O on RJ45 connectors.
