The Opportunity

Grass Valley is seeking a fulltime **Software Development Engineer** to help develop video editing and video server systems. The engineer will join the STRATUS team and help develop media management solutions across Grass Valley's platforms.

This position requires a hands-on engineer with strong engineering and programming skills and ambition to take on new projects, define and own what needs to be done, and see it through to conclusion.

The Software Development Engineer will have direct involvement in the main aspects of the software development lifecycle. The role involves close collaboration with the other groups in the company in order to deliver high quality solutions to our customers.

Your Role

- Responsible for application design and development in partnership with technical architects;
- Product/Features implementation, code review, follow and ensure compliance with the coding practices;
- Create, optimize and maintain unit tests;
- Execute engineering test before handing over to QA;
- Prepare user support materials in partnership with technical writers;
- Provide maintenance support by investigating and rectifying reported systems shortcomings;
- Apply and optimize software development practices, including SDLC, development, testing and integration in Agile/Scrum environment;
- Opportunities to work with people across geographies primarily in US, Japan and UK

What you Have to Offer

- Bachelor degree in Software Engineering, Computer Science or equivalent
- Minimum 2 years of development experience with .Net Framework, C#, HTML, WCF, WPF, MVVM, REST, Web Services
- Understand Object Oriented Design, Data Structures, Design Patterns, Service Oriented Architecture (SOA) design
- Knowledge of following technologies will be advantageous: C++, Javascript, TypeScript, JQuery, HTML5, micro-services, Kubernetes, Docker containers, Cloud deployment, MongoDB
- Knowledge of the following tools will be advantageous: Visual Studio, MSSQL server, NUnit Testing, SVN, Git, UML, IIS, WAS, Active Directory
- Experience debugging complex large-scale systems and applications on Windows platforms
- Excellent written and verbal communication skills
- A passion for writing quality software
- Great accuracy and attention to detail in all aspects of software development
- Team player, proactive, motivated and good communication skills
- Analytical and strong problem solving skills
- Passionate for continuous learning and able to adapt to fast-changing technologies and environments
