### The Opportunity

Grass Valley is seeking a fulltime **Software Team Lead & Scrum Master** to help lead in video editing and video server systems development. This position will join the SCS/STRATUS team and help drive the development of media management solutions across Grass Valley's platforms.

This position will have direct involvement in the main aspects of the software development lifecycle. The role involves close collaboration with the other groups in the company in order to deliver high quality solutions to our customers.

## Your Role

- Lead a team of Software Developers and Testers;
- Drive daily Scrum practices of the team;
- Communicate with external stakeholders on schedules and requirements;
- Influencing team dynamics and shaping team culture to deliver results;
- Provide technical leadership to teammates through coaching and mentorship;
- Establish and govern good development practices and habits;
- Drive and optimize software development practices, including SDLC, development, testing and integration in Agile/Scrum environment;
- Collaborate with people across geographies primarily in US, Japan and UK.

## What you Have to Offer

- Bachelor degree in Software Engineering, Computer Science or equivalent
- Minimum 5 years of development experience with .Net Framework, C#, HTML, WCF, WPF, MVVM, REST, Web Services
- Understand Object Oriented Design, Data Structures, Design Patterns, Service Oriented Architecture (SOA) design
- Knowledge of following technologies will be advantageous: C++, Javascript, TypeScript, JQuery, HTML5, micro-services, Kubernetes, Docker containers, Cloud deployment, MongoDB
- Knowledge of the following tools will be advantageous: Visual Studio, MSSQL server, NUnit Testing, SVN, Git, UML, IIS, WAS, Active Directory
- Prior experience in leading Software Development Team will be advantageous
- Experience with Agile Scrum methodologies
- Experience debugging complex large-scale systems and applications on Windows platforms
- Excellent written and verbal communication skills
- Great accuracy and attention to detail in all aspects of software development
- Analytical and strong problem solving skills
- Passionate for continuous learning and able to adapt to fast-changing technologies and environments
