

EAP-3101

NOTE: The iControl compatibilities shown below are estimated initial support. iControl versions that are older than those specified may prevent the GUI from opening or may work with bugs and limited features.

VERSION: 300

Release date: 2013-04-24

iControl compatibility: v4.42 and up iControl Solo compatibility: 4.42

RCP-200 compatibility: Not supported

Hardware incompatibility: This firmware applies to all existing hardware assembly.

ENHANCEMENTS & NEW FEATURES

| Ref# | Description |
|--------------------|--|
| <u>37905</u> | Miranda ALC Extended to 8 programs. |
| 37904 | Miranda ALC enhancement Added True peak. Also added preset mode: EBU R128, A85 ITU BS.1770 and ARIB |
| ICONTROL- 16127 | Loudness Logging Loudness logging up to 4 independent programs. |
| ICONTROL- 16126 | Loudness Measurement Loudness measurement compliant to EBU R128, A85 and ARIB. Loudness measurement up to 4 independent programs: short Term, Momentary and True Peak max |
| ICONTROL- 16137 | New SFP info tab Add new status: type, part number, serial number, data Code, temperature, voltage, optical power and wavelength. |
| ICONTROL- 16142 | Automatic Preset Recall With this feature, the card automatically recall user presets based on audio detection scheme. For example, a 5.1/2.0 detection scheme can be used to load a predetermined User Preset if 2.0 audio is detected and a different User Preset when 5.1 is detected. This feature has been implemented in many ANC's, but always as fixed configuration. This implementation is user-configurable in iControl. |

BUGFIXES

| Bug# | Description |
|-------------------|---|
| <u>37596</u> | External reference timing is not aligned to output |
| 37769 | Video Payload ID 3G output is not the same as input. |
| <u>35137</u> | ALC Loudness measurement doesn't consider LFE for correction. Also weighting is applied on surround channels. As specified on ITU-r BS.1770-1 |
| 001.00 | Support for Sony PDW700 camera SD output audio distribution |
| 001-00- 008494 | The SD embedded audio coming out of the Sony PDW700 camera has 8 audio samples on some video lines, which does not follow SMPTE 272M. This caused audio glitches at the output. |

KNOWN BUGS & LIMITATIONS

| Bug# | Description |
|--------------|--|
| <u>24794</u> | Metadata packet insertion during 3G Level B outputs. During 3G Level B operation, there may be situations where output Ancillary Time Code (ATC) packets will be inserted on Link B. Asynchronous sources with respect to the reference may insert ATC packets on Link B instead of Link A. If the source and reference are synchronous, then ATC packets may find themselves on Link B depending on the source's timing with respect to the reference. An aligned input places ATC packets on the proper link (Link A). This situation does not occur when no reference is installed. |

FIRMWARE VERSION: 201(201-99-1285)

Release date: 2010-09-28

iControl compatibility: v3.7 (build 21) +

iControl Solo compatibility: v3.7

RCP-200 compatibility: v 1.10

Custom software compatibility: NA

Hardware incompatibility: This firmware applies to all existing hardware assemblies.

BUGFIXES

| Bug# | Description |
|--------------|-------------------------------|
| <u>29024</u> | Corrupted video in 3G level-B |

ENHANCEMENTS & NEW FEATURES

| Bug# | Description |
|------|---|
| - | The audio/video fingerprint generation. Available in iControl 4.0 only. |

KNOWN BUGS & LIMITATIONS

| Bug# Description | |
|--------------------|--|
|--------------------|--|

2013-06-11 Page 3 of 4

FIRMWARE VERSION: 200

Release date: 2010-06-30

iControl compatibility: v3.70

iControl Solo compatibility: v3.70

RCP-200 compatibility: N/A

Custom software compatibility: NA

Hardware incompatibility: This firmware applies to all existing hardware assembly.

BUGFIXES

| Bug# | Description |
|------|-------------|
|------|-------------|

ENHANCEMENTS & NEW FEATURES

| Bug# | Description |
|------|---|
| 1 | The test tone inserter for out of service lip-sync measurement |
| - | The on-board SIMM-72 socket is enabled and the following modules are supported |
| 1 | MOD-DOLBY-ENC-E (v1.1.2.0/v1.1.3.3) |
| - | MOD-DOLBY-ENC-D (v1.0.2.5/v1.0.2.7) |
| - | MOD-DOLBY-DEC (v1.2.3.2/v1.2.0.12) |
| 1 | MOD-LA-DUP-701 |
| 1 | MOD-LA-ALC-x (2/6/8-v1.3.0.0/v1.3.1.0/v1.4.0.0) |
| - | MOD-LA-ALC-x-DUP (2/6/8-v1.3.0.0/v1.3.1.0/v1.4.0.0) |
| 1 | MOD-JA-ALC-x (2/6/8-v1.5.0.0) |
| 1 | MOD-JA-ALC-x-DUP (2/6/8-v1.5.0.0) |
| 1 | The loudness measurement option is available |
| - | Time code is automatically and frame-accurately generated when GPI embedding has been enabled and no valid time code has been detected. This generated time code is forced to 00:00:00:00 and does not increment. |
| - | A GPI latch mode allows the user to maintain the GPI output levels when no valid time code with embedded GPI data has been detected or to simply release the GPI output levels during this time |

KNOWN BUGS & LIMITATIONS

| Bug# | Description |
|------|--|
| - | The audio/video fingerprint generation is not available. |
