# *2020ADC Release Notes*

## **Introduction**

This document provides information on the latest software release for the 2020ADC 4 Channel Audio A-D Converter module. Read this document completely before attempting to update to the latest software.

**CAUTION** These notes contain critical information concerning the updating process. Do not update software without completely reading [Software Updating on page 4](#).

This document details:

- Version 2.0.1A Release features and operation,
- System Requirements,
- Software Updating, and
- Accessing Reference Documents.

Pertinent reference documents are available on-line or hard copies can be ordered from Grass Valley. For more information, see [Accessing Reference Documents](#) at the end of these Notes.

## Version 2.0.1A Software Release

The v2.0.1A software release for the 2020ADC module enables remote control and monitoring capability for the module with a web browser interface (GUI).

The manual is available on-line in PDF format or can be ordered in hard copy.

## System Requirements

For remote control and monitoring capability, the module must be installed in a Kameleon 2000 frame equipped with a 2000NET module. For more information on Kameleon 2000 frames and the 2000NET module refer to the following reference documents:

- 2000NET Network Interface Instruction Manual
- 2000 Frames Instruction Manual

## Software Updating

Currently, the only recommended method of software updating is done with a software kit that includes a CD-ROM with the current software files and a serial cable assembly (8900-FLoad-CBL) available from Grass Valley.

Refer to the 8900-FLOAD-CBL Software Upgrade Instructions manual in pdf format on the CD-ROM for complete updating instructions.

## Accessing Reference Documents

For on-line access to any of the reference documents referred to in these Release Notes, navigate to the following URL:
