

Go! Premiere Pro

Go! Plugin For Adobe Premiere Pro

Create better programs fast and efficiently with the Go! Plugin for Adobe Premiere Pro. Using Go! media in your Premiere Pro workflow has never been easier.

The Go! Premiere Pro plugin for Adobe Premiere Pro from Grass Valley, a Belden Brand, allows teams of people to work together to create great content for OTT and live television.

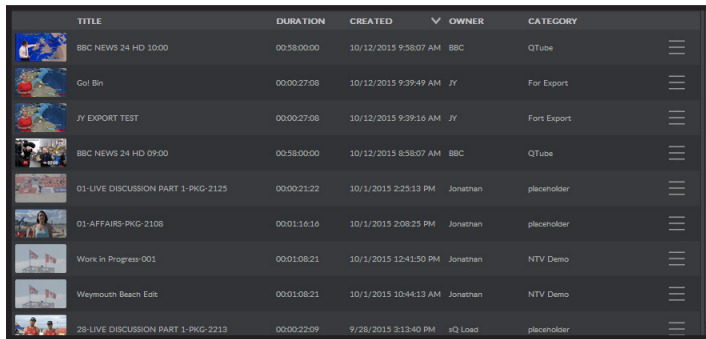

Go! Premiere Pro is a comprehensive tool kit for building workflows around ingest, editing, playout, file exporting, archiving, logging, newsroom computer systems, routers, media asset management and system management. Many of these workflows are provided by third-parties, so integration is key in keeping the workflow seamless. Go! Premiere Pro allows just that.

Using the Go! Premiere Pro plugin for Adobe Premiere media in your Premiere Pro workflow couldn't be simpler. Searching Go! using the plugin directly from Premiere Pro, previewing and downloading clips and sub-clips for live recording and in-progress ingests, adding local content and effects and then uploading your finished program back to Go! is fast and simple.

The plugin is easy to use with no training required. It allows Premiere Pro editors to use their existing software, to avoid the disruption and high costs associated with new software installation and training programs.

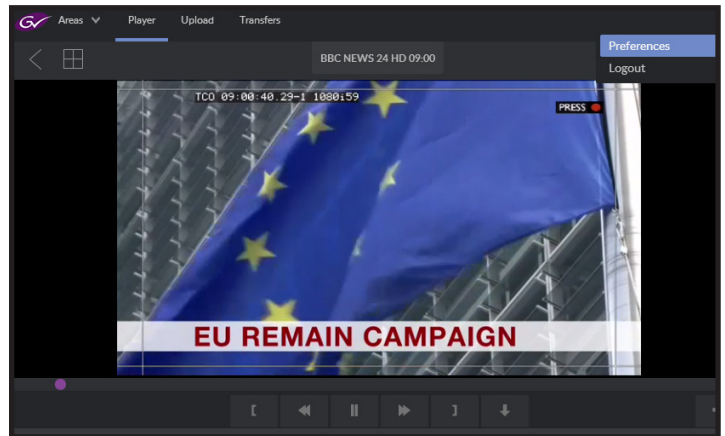

KEY FEATURES

- Simple one-click plugin installation
- No local license required
- Appears as a native Premiere Pro panel
- No need for dual ingest and file movement
- Fast and simple operation
